## **PFOA and PFCA C9-C14 declaration**

- Ansulex LPH R-102 Liquid Agent

Ansulex LPH R-102 Liquid Agent is not formulated with PFAS (per- and polyfluorinated alkyl substances, PFOA and C9-C14 PFCAs among them), including PFOA and PFCAs.

We do not intentionally add PFOA or C9-C14 PFCAs into the product. PFASs are not used in any way during the manufacture of the product.

Therefore, the product should keep the regulatory given limits in regulation (EU) 2017/1000 and 2020/784 on PFOA, its salts and PFOA related substances, and regulation (EU) 2021/1297 amending Annex XVII to REACH with regard perfluorocarboxylic acids containing 9 to 14 carbon atoms in the chain (C9-C14 PFCAs), their salts and C9-C14 PFCA-related substances.

Possibly very low unintentional traces which may result from the ubiquitous background contamination with these substances could be present.
